## BATTERIES.

**W**E are among the pioneers in the manufacture of open circuit carbon Batteries. It has been our aim to produce a high grade battery, using only the very best material, and at the same time to sell our product at as low a price as would be consistent, taking into consideration the SUPERIOR QUALITY of our goods.

## The New Peru Hercules Battery.

This Battery consists of a fluted carbon cylinder or vase filled with depolarizing compound. The large surface of zinc exposed makes it one of the best batteries for open circuit work. The cell is charged with 4 ounces of sal ammoniac and 28 ounces water, and has an E. M. F. of 1.47 volts; internal resistance .11 ohms, and current on short circuit about 13.4 amperes.

## New Peru Oval Laclede Battery.

The Oval Laclede Battery consists of an oval jar and a large cylinder of oval carbon, with opening in top through which the zinc hangs supported by a porcelain insulator. The carbon forms a perfect lid for the battery and prevents evaporation or the climbing of salts. The solution for the oval form consists of four ounces of sal ammoniac dissolved in one and a half pints of water.
